

Introducing

Stops Bleeding Instantly

For larger wounds or multiple cuts and lacerations

Provides a microbial barrier to seal and protect a wound

Benefits:

- Same patented powder technology as QR Powder/WoundSeal, that stops bleeding in seconds and seals a wound.
- Single-use bottle with more powder for fast and easy application
- Clinically proven to stop bleeding on larger wounds in a Department of Defense study

Keep WoundSeal Rapid Response on hand in:

- Fleet vehicles • First aid kits/cabinets • At remote worksites
- Anywhere workers are at risk for more significant cuts and lacerations, such as construction, manufacturing, and mining industries

WOUNDSEAL™
RAPID RESPONSE

Topical Powder

WOSS02B

To order WoundSeal Rapid Response or other WoundSeal products, please contact your preferred first aid distributor. For additional information or further assistance, please visit www.biolife.com or call 1-800-722-7559.

BIOLIFE®

A New Name For the Powder You Trust

WOUNDSEAL™

From the makers of QR Powder

**STOPS BLEEDING
INSTANTLY**

New Name

We've made it easier to identify the function of the product at a glance. While the name is changing, the product is the same topical powder that you have come to know and trust. WoundSeal stops bleeding, seals wounds and gets employees back to work quickly, saving time and unnecessary medical expense.

New Look

WoundSeal Pour Pack

WoundSeal Pour Pack contains the same powder technology now in a convenient, easy-to-tear open package with 50% more powder per application and a better pour for easy application. The Pour Pack is perfect for easy-to-reach cuts and lacerations. Each unit contains two Pour Packs.

WoundSeal + Applicator

WoundSeal + Applicator now offers two applications for the price of one! The special applicator delivers the powder to hard-to-reach wounds such as head wounds and nosebleeds, and is also helpful when applying powder on another person.

New Product

WoundSeal Rapid Response

WoundSeal Rapid Response offers five times more powder than the Pour Pack and is designed to stop bleeding from larger wounds or multiple cuts and lacerations.

The WoundSeal Lineup - *Added Value* for kits and cabinets

WoundSeal also has a separate line of products specifically designed for pre-filled kits and cabinets..

Ask your first-aid distributor for more details.
